

CISA Exam Preparation – Review Course

Course Description

The CISA Exam Preparation course is an intensive review program designed to prepare professionals for the Certified Information Systems Auditor™ (CISA) exam. The course focuses on the key points covered in the **CISA Review Manual 27^h Edition** and includes class lectures, group discussions, exam practice and answer debriefs.

Prerequisites

There are no prerequisite requirements for taking the CISA Exam Preparation Course or the CISA exam; however, in order to apply for CISA certification, the candidate must meet the necessary experience requirements determined by ISACA.

Course Objectives

Upon completion of the CISA Exam Preparation course, participants will be prepared with the following for success on the exam:

- Follow the format and structure of the CISA certification exam
- Identify the various topics and technical areas covered by the exam
- Implement strategies, tips and techniques for taking and passing the exam
- Apply key learning to the practice questions

Course Content

The CISA Exam Preparation Course comprises the following sections, covering the following topics:

- General information regarding the exam
- **Domain 1:** The Process of Auditing Information Systems
- **Domain 2:** Governance and Management of IT
- **Domain 3:** Information Systems Acquisition, Development and Implementation
- **Domain 4:** Information Systems Operations, Maintenance and Service Management
- **Domain 5:** Protection of Information Assets
- Exam Practice

Each domain will be covered with worth of information presented via lecture, group discussion and practice questions.

Who Should Attend

The course would be useful for CISA Exam Candidates, as well as practicing professionals working in Information Security, IT/Internal/External Audit, Information Technology management, Governance, etc.
